# **Project Manager**

By Rocket Sammies

#### Roles

```
Anya Keller - Project Manager
Dhiraj Patel - front end
Wilson Berkow - front end; back end as necessary
Jonathan Buhler - back end
James Wang - back end
```

#### **About**

Project Manager is a gradebook with an emphasis on easy assignment, oversight, and grading of group projects.

#### **Features**

- Create custom rubrics
- Fill out rubrics and return them with/without comments
- Oversee projects with intermediate submissions/checkpoints
- See grading deadlines and receive notifications upon assignment submission
- Send emails to groups
- View old projects
- Grade projects

#### Schema

```
Users collection
[{
    "email": "user@example.com",
    "name": "John Doe",
    "password":
"5e884898da28047151d0e56f8dc6292773603d0d6aabbdd62a11ef721d1542d8",
    "type": "student",
    "classes": {
        123456: [
```

```
"hw1-123456": 100
    ]
  }
},
  "email": "user2@example.com",
  "name": "John Doe 2",
  "password":
"5e884898da28047151d0e56f8dc6292773603d0d6aabbdd62a11ef721d1542d8",
  "type": "teacher",
  "classes": ["123456"]
}]
Classes collection
  "id": 123456.
  "name": "Class Period 8",
  "teacher": "Jane Doe",
  "students": ["user@example.com", "user2@example.com"],
  "weights": {"homework": 0.01, "project": 0.99},
  "assignments": ["hw1-123456"]
}]
Assignments collection
[{
  "id": 10309,
  "class": 123456,
  "name": "HW 1",
  "type": "homework"
},
  "id": 10310,
  "class": 123456,
  "name": "Project 1",
  "type": "project",
  "members": [
     "user@example.com",
     "user2@example.com"
  ],
  "rubric": [
       "category": "unboosted-ness",
       "maximum-score": 10,
```

```
"score": 1
     }
  ]
}]
Submissions collection
  "id": "sub-hw1",
  "class": 123456,
  "assignment-id": 10309,
  "type": "file",
  "submission": "/path/to/file"
},
  "id": "sub-p1",
  "class": 123456.
  "assignment-id": 10310,
  "type": "text",
  "submission": "https://github.com/anyakeller/rocket-sammies"
}]
```

### **Component Map**

- Templates:
  - o login.html
  - dashboard.html
  - gradebook.html
  - o input.html
  - o class.html
  - assignment.html
  - project.html
  - user common.html
- Flask:
  - o app.py: Contains main view routes, and runs the app
  - decorators.py: Contains decorators for app routes
  - o api.py: Contains flask blueprints for REST api endpoints
  - Utils:
    - security.py: Handles creation of new accounts and the validation of login credentials
    - notifications.py: Routinely checks for any notifications to send based on changes to database
    - export.py: Creates various different spreadsheets based off of grades, students, groups, assignments etc. Can also export to a separate file of the user's choosing.

- grading.py: Uses weighing values in database to assign grades to a project easily and in a customizable manner
- graphs.py: Using D3 or some other graphic library, will create graphs based on grades to help analysis and provide useful visual information for the user
- input.py: Can be used for manually inputting grades into database for assignments other than projects
- o Data:
  - mongo.py: Interacts with mongoDB to retrieve information for other files
    - Keeps data on accounts, students, classes, assignments, submissions, and dates
- Bootstrap mumbo-jumbo

## Site Map

- Login page
- Dashboard
  - overview of courses
  - notifications, e.g: "x, y and z submitted w"
- Gradebook
  - View grades in a spreadsheet-like format, by student (all his/her assignments), or by assignment (all students), either from one class or all classes
  - An export to spreadsheet feature
  - Give grades on assignments projects
  - Extra functionality: draw graphs and make comparisons between classes, forms on tests, etc.
- Class view
  - list and/or calendar of upcoming assignments
  - roster of students in the class
- Assignment view
  - list of groups/individuals working on this assignment
  - the rubric
  - upcoming deadlines
- Project viewer -- see aspects of a given student's or group's project
